

The Basic Balloon Hat Base

- 1) Inflate a balloon, leaving a 2-inch un-inflated tail at the end.
- 2) Twist a 1-inch bubble in from the tied end.
- 3) Holding that twist, wrap the balloon around the person's head, like a crown and twist where the bubble meets. Try not to make it too snug, give a little extra slack before you make this twist.
- 4) The hat should now fit.

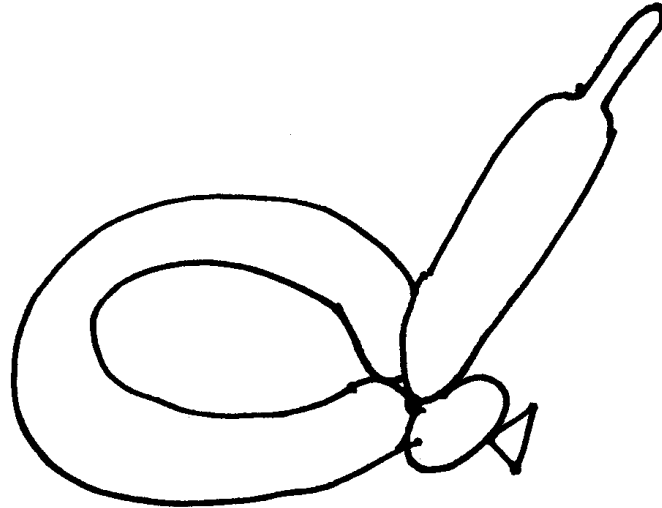

You have just made the basic balloon hat base.

- 5) To make a "helmet" fold the unused antenna back over the head and twist onto the crown section at the back.
